

# Your help is needed today... ...to make the difference tomorrow

Aid is finally starting to get into the hands of Haitians who most desperately need it. But it is now more than abundantly clear to rebuild this devastated country is going to take much more time and money.

Just a Drop's role will be to focus on Haiti's water & sanitation infrastructure because without a clean, safe and sustainable water supply people will not be able to start rebuilding their lives.

To do that we need your support to undertake essential work in local communities before the world simply forgets Haiti. To make a personal or company donation [please visit our website](#)

Whatever you give will make a significant difference and our experienced engineers will fly in post the emergency relief operation to establish how communities can be supported at a local level with essential water and sanitation.

Thank You,

Fiona

Chairman, Just a Drop
